

Theseus Care Coordinator

The simple, low cost solution to assigning inter-agency Identified Care Coordinators to clients

Keep on top of TOPs

Care Coordinator is your easy solution to mandatory Treatment Outcome Profiles for all the agencies in your DAT area.

- See at a glance the Identified Care Coordinator and Key Workers for all of your clients using this innovative new web based system
- Enable all agencies in your area to access secure information about Identified Care Coordinators and easily identify all outstanding Treatment Outcome Profiles
- Deliver information using client attributors in anonymous format over the Internet
- Identify if new clients are already receiving treatment elsewhere and avoid wasted referrals

Care Coordinator gives you information in “real time”. The user friendly system allows you to access contact details of Key Workers at the press of a button and easily identify all outstanding Treatment Outcome Profiles.

Feedback from the first multi-agency DATs to use Theseus Care Coordinator confirms that Theseus CC is being well received.

“We were concerned about the amount of time we would have to spend on making sure no TOPs were overlooked. Theseus Care Coordinator gives us the assurance that no TOP returns will be missed.”

Craig Wilkes
Operational Support Coordinator
Oldham DAAT

Theseus Care Coordinator

Care Coordinator is designed to complement existing case management systems and avoid the need for unnecessary paper based records. You get:

- Built in reports
- Instant set up – be up and running within a week of placing your order
- Low monthly cost from as little as £150 per month
- On-line help

Hosted Solution

Theseus **Care Coordinator** is available as a fully hosted solution that is simple and quick to set up and use.

Be up and running within one week of order placement with a hosted solution on fully managed secure servers in Cyber Media's secure hosting facility. Pricing is based on the number of clients in the DAT and is independent of the number of agencies or workers using the system in the particular DAT.
