

Theseus Enterprise

Theseus Enterprise is a fully integrated caseload management solution for the complete drug and alcohol treatment programme.

What is Theseus Enterprise?

Managing a drug and alcohol treatment programme presents considerable challenges in overseeing the client journey; from collecting and storing client data, retaining clients transferring between services and efficiently managing the caseload; to production of reports for statutory bodies.

Theseus Enterprise is a fully integrated suite of browser based applications that supports workers and management in the drug and alcohol treatment field by providing the complete solution to their challenges.

Theseus Enterprise

Theseus Enterprise brings together the Theseus applications in a fully integrated and interconnected suite offering unique overall benefits:

- Tracking the whole client journey, from initial agreement to evaluation and treatment
- Managing the overall targets for the entire DAAT
- Reporting across the entire Drug and Alcohol Treatment Programme
- Simplifying information exchange between agencies

Other Theseus Enterprise benefits include:

- Easy to use, and easy to learn to use
- Extensive front end validation
- Comprehensive reporting suite

“Users appreciate its ease of use; we can already see the benefits in our overall operation.”

**DIP Manager
Tameside DAT**

Theseus CJ is a caseload management system for Criminal Justice workers in DIPs and CARATs

Theseus TA is a caseload management system for Treatment Agencies and Healthcare teams
