

## Theseus Criminal Justice

**An unrivalled IDTS  
Caseload Management  
System**

**for CARAT and  
Healthcare teams**

**for DAAT teams and  
Treatment Agencies**

### **What is Theseus CJ?**

***Theseus CJ is a product that helps drug treatment teams to enter data more efficiently, manage caseloads more effectively and report upon team efficacy more accurately***

Managing a drug treatment programme in a prison or the community presents considerable challenges: not just wanting to deliver effective treatment, but also collecting and storing prisoner and client data, overall caseload management, performance management, and production of data extracts for the Home Office and the NTA.

Theseus CJ, implemented by Cyber Media in collaboration with Oldham Drugs and Alcohol Action Team, provides an easy to use and effective solution to all of these challenges, and more.

Theseus CJ supports the management of DAAT clients and drug misusing prisoners from initial contact, through Detox and substitute Prescribing, to stabilisation and eventual release back into the community, eliminating the need for paper records such as DIR and activity forms. Using Theseus CJ means that the CARAT team can see the clinical case notes as soon as they have been entered by the Healthcare team.

Arguably the easiest to use system in this field Theseus CJ will ensure that performance targets are met while delivering the most appropriate care for each prisoner.

# Theseus Criminal Justice

## Features

### Powerful case-management system

- Personalised initial screen featuring all IDTS case management data
- Fully compliant with latest NDTMS Data Set including TOPs data
- DIRs and Activity Forms
- Enhanced caseload manager, featuring forthcoming appointments, reminders, last contacts, review date setting
- Single or Multiple Agency solutions
- Harm Reduction module
- Sophisticated client search facility
- Risk warning

### Prescribing

- Uses Medication Profiles for standard Prescriptions
- Increasing, reducing and flat scripts
- Full prescribing history for all clients
- Customised forms for recording the dispensing of controlled substances
- FP10 and FP10 [MDA] supported
- Repeat Prescriptions

### Comprehensive reporting function

- Dynamic reporting via integrated reports package
- NTA monthly update, Government Office Performance Management framework reporting
- Export directly to DIMIS—no more need for DIRWeb data entry
- Export to third party applications for further data analysis

### Low training requirement

- Exceptionally easy to use
- Flexible deployment using browsers
- Intuitive look and feel

### Server-based Web-enabled application

- Secure SQL Server Database
- Active Directory integration
- Local hosting options
- Extensive client focused multi team role based security
