

Theseus Criminal Justice

**An unrivalled Caseload
Management System
for Community
Drug Treatment
Programmes**

What is Theseus CJ?

Theseus CJ is a product that helps drug treatment teams to enter data more efficiently, manage caseloads more effectively and report upon team efficacy more accurately

Theseus CJ is a caseload management system for Criminal Justice workers (DIP, DAT, Prisons, CARAT, Police), that has been developed with the case worker in mind. An easy to use solution that leads the user through all of the relevant forms, and with helpful prompts to ensure that accurate and timely information is collected.

Furthermore, Theseus CJ helps to ensure that the treatment objectives are met by highlighting any dates and obligations that would compromise the achievement of increasingly demanding targets. Using Theseus CJ means that paperwork is practically eliminated, data entry time is kept to an absolute minimum, and that achievement of targets is maximised. Ultimately this means that the client is treated with a minimum of time spent filling in forms, and the ensuing good results are accurately recorded and reported.

Theseus Criminal Justice

Features

Powerful case-management system

- Personalised initial screen featuring time-sensitive case management data
- Enhanced caseload manager, featuring forthcoming appointments, reminders, last contacts, review date setting
- Sophisticated client search facility
